- React.js
- Noda.js

## PROJECT

**Traveling Website**                          2023-2024

- Creating a travel website using HTML, CSS, and JavaScript involves designing an interactive and visually appealing platform for users to explore destinations, book trips, or get travel tips. Here's a breakdown of what you'll need:

  1 . Technologies to Use:
  - HTML: Structure of the website (e.g., homepage, destination pages, booking form).
  - CSS: Styling for layout, colors, fonts, and animations (use frameworks like Bootstrap or Tailwind CSS for faster development).
  - JavaScript: Interactive elements (e.g., image sliders, search filters, booking forms).
  - APIs: Use travel-related APIs like Google Maps API, Skyscanner API, or Open Weather API for live updates.
  - Backend (Optional): If you need user accounts, bookings, or payments, use Node.js or Firebase for a simple backend.

## LANGUAGES

- English
- Hindi
- Gujarati
